1

ANTIBIOTICS

New method development for multi class antibiotic detection in meat

2

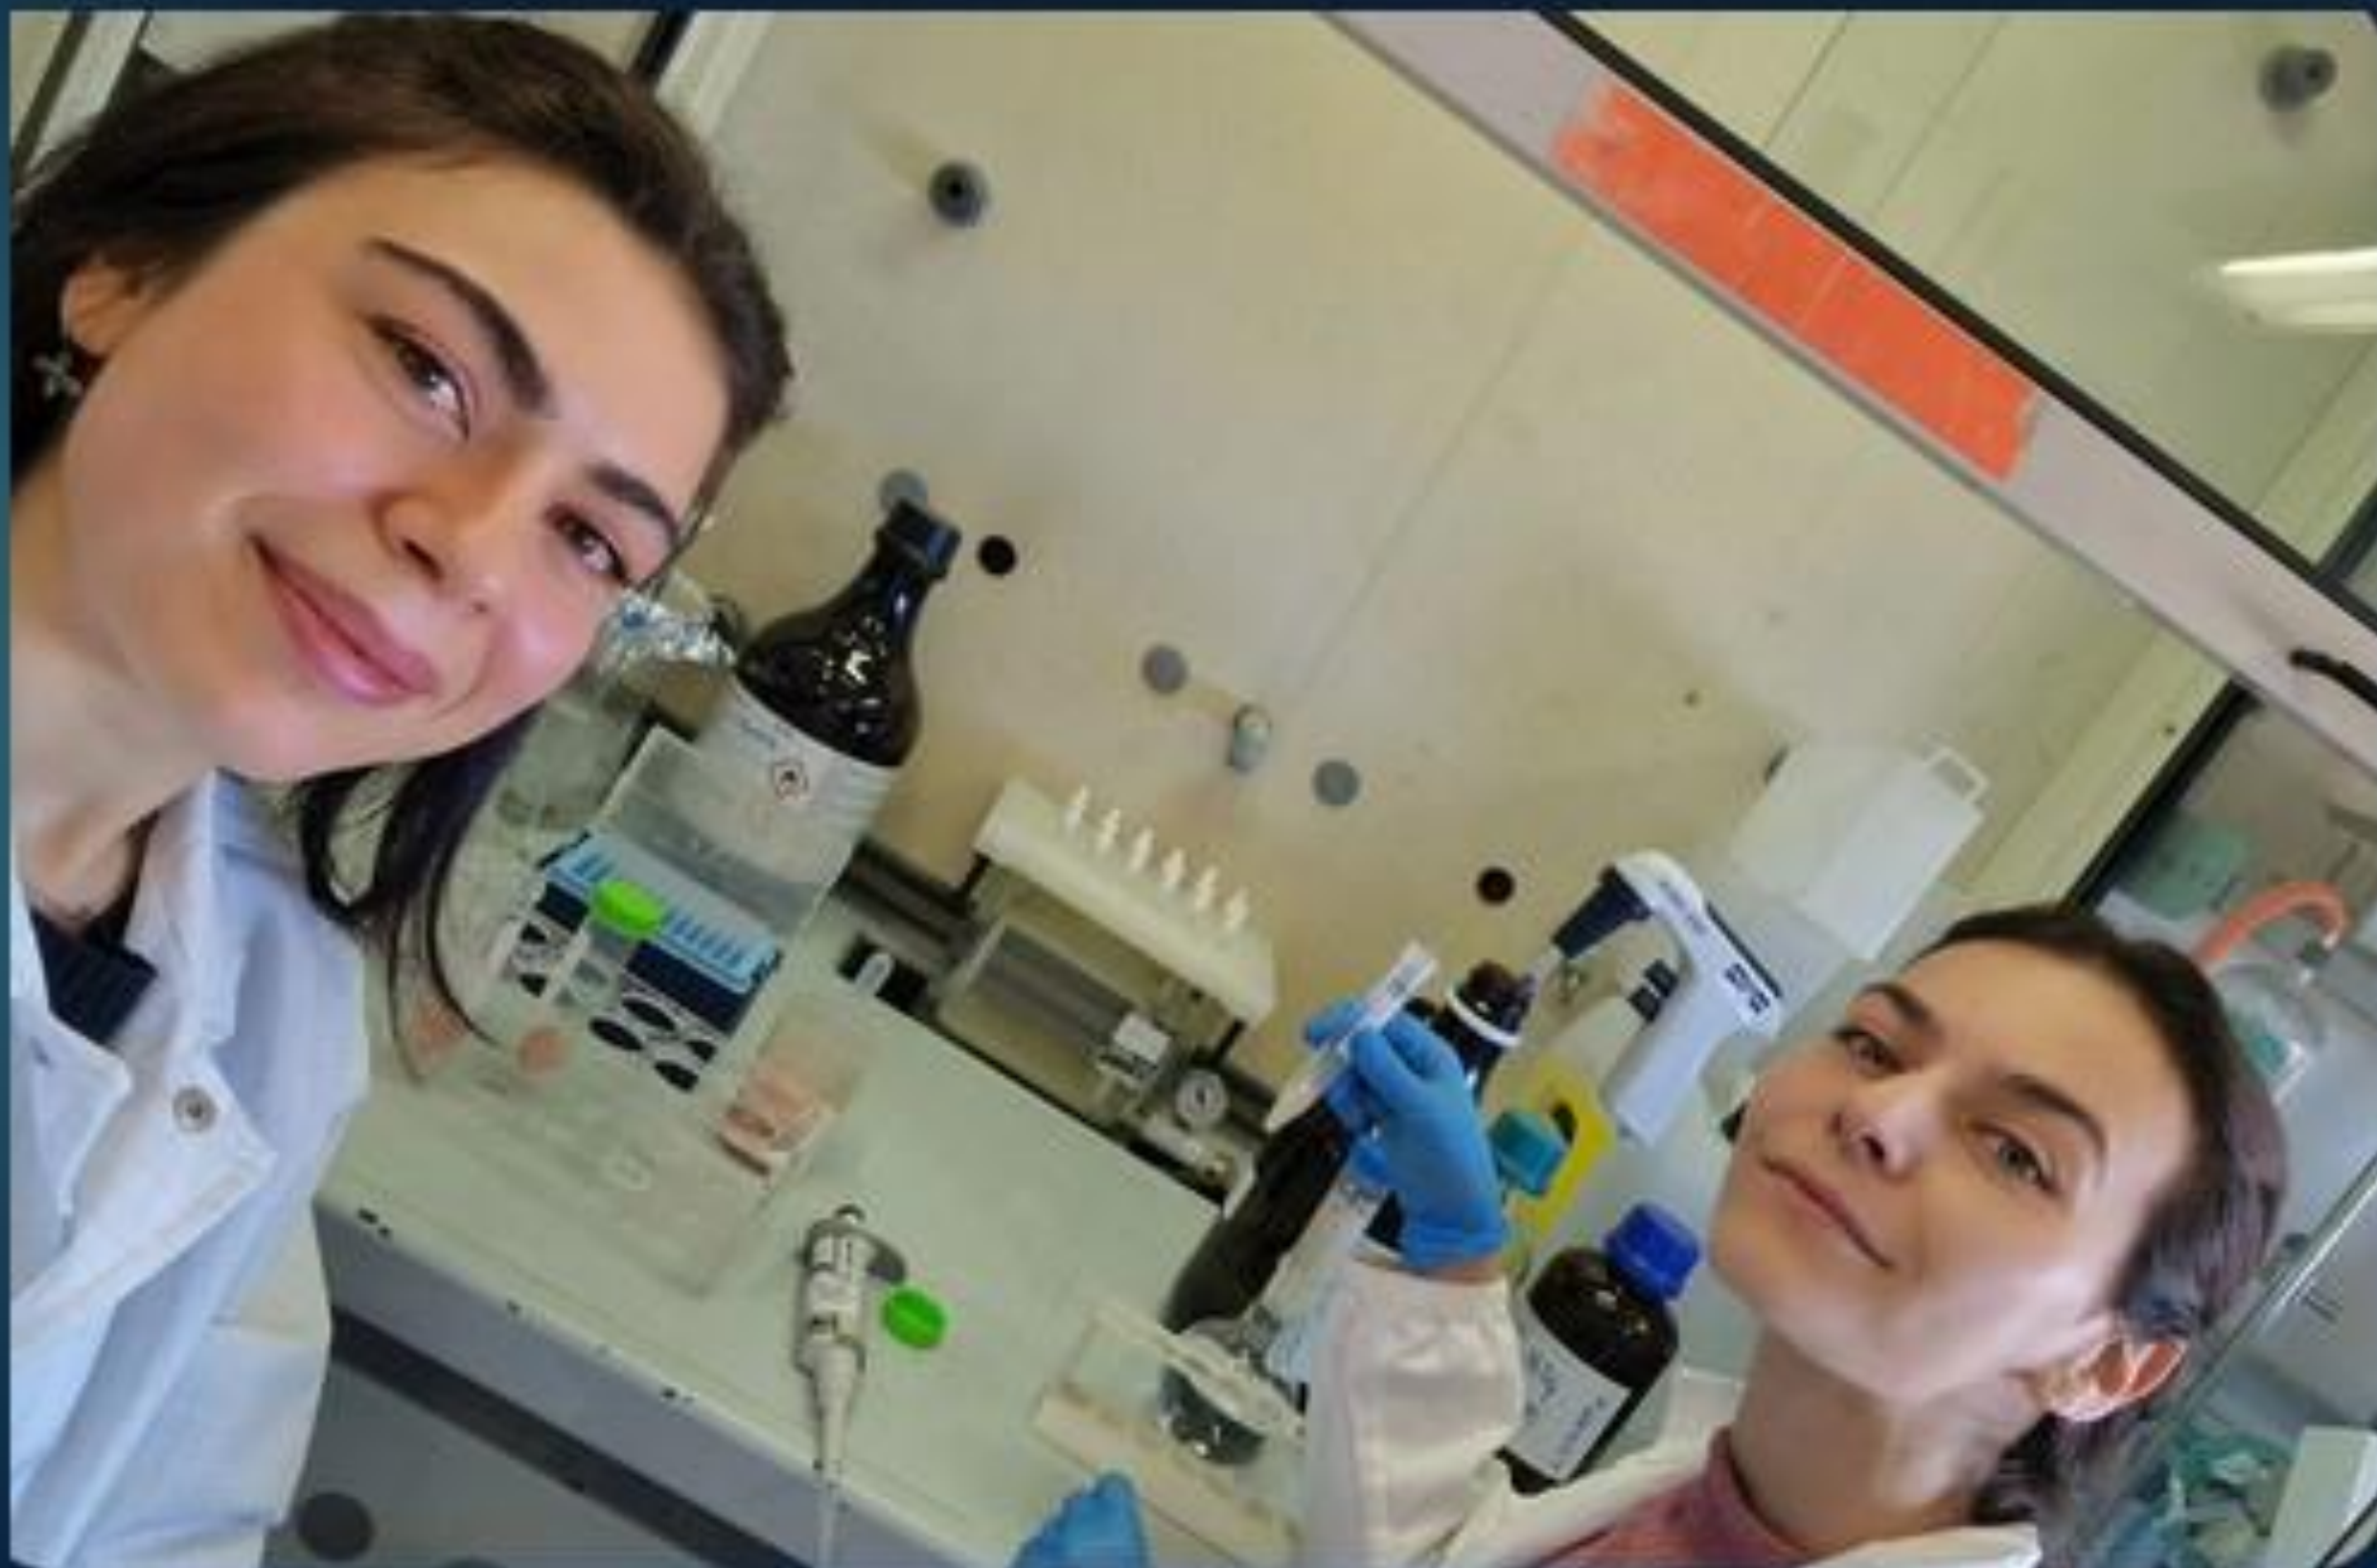

PFAS

Extendend
monitoring of
contaminants in
seafood

COOPERATION

Together for food control, promoting
your health

4

ALTERNARIA TOXINS IN TOMATOES

New method
development for
detection of
Alternaria toxins
and Pesticides in
Tomato Products

5

FOOD SAFETY

Mycotoxins and Pesticides monitoring
in Conventional and Organic tomatoes

6

GLYPHOSATE IN HONEYBEES

New Method
development for
detection of Polar
Pesticides in
Honeybees

7

ENVIRONMENTAL MONITORING

Exposition Risk Assessment

CONTAMINANTS IN NOVEL FOOD

New methods for
determination of multiple
and emerging
contaminants in edible
insects

REGULATORY SUPPORT

Evidence-Based Normative Support
